SUMMARY

Senior Software Engineer with 10+ years of experience building large-scale enterprise web applications using Angular, TypeScript, JavaScript, and Node.js. Experienced in leading frontend architecture, delivering end-to-end features, designing reusable UI components, collaborating with cross-functional teams, and mentoring engineers. Strong background in performance optimization, accessibility, REST APIs, scalable application design, CI/CD, and modern AI-assisted software development. Experienced in Spec-Driven Development (SDD) and agentic development workflows using tools such as Claude, OpenAI Codex, and Cursor.

SKILLS

Node.js, Express.js
Angular, TypeScript, JavaScript
Microservices, Distributed System Development, Web services, Micro Frontend Architecture
CI/CD, Test Driven Development, Spec-Driven Development (SDD), AI-Assisted Development, Agentic Coding, Root Cause Analysis
GCP, Azure
Kafka, GitLab, Jira, Slack
Docker, Containers, Jenkins, Pip
MongoDB, Postgres SQL, Relational Databases, Data Modeling
HTML5, CSS3, SCSS, MUI, Material-UI
Software design, Complexity analysis, Development, Debugging
Cloud infrastructure, Data security, Cloud security
Responsive Design, UI Engineering Best Practices, Performance, Accessibility, UX Theory
Linux, Shell Scripting, Automation
Collaboration, Team Player, Self-Motivated, Quick Learner

Saleem Ulla Khan

Senior Software Engineer

EXPERIENCE

Senior Software Engineer

Mimecast

07/2024 - Present

- Contributing to a next-generation email security platform spanning multiple products, built with Angular micro frontends in an Nx monorepo.
- Adopted Spec-Driven Development (SDD) and agentic coding workflows to translate requirements into structured specifications, implementation plans, and production-ready code, improving development consistency and accelerating feature delivery.
- Owned features from UI components and state management through API consumption, error handling, and contract alignment with backend teams.
- Improved shared UI libraries and build tooling, contributing to platform quality and cross-team delivery.
- Delivered end-to-end features across frontend and backend, implementing intuitive user flows, forms, and data tables on the client side.
- Improved shared UI libraries and build tooling, contributing to platform quality, consistency, and cross-team feature delivery.

Senior Software Engineer

Epsilon

09/2021 - 07/2024

- Led the migration of existing enterprise applications to a new internal framework, ensuring a seamless transition, minimal disruption, and improved system performance.
- Integrated Changelog tracking with Kafka and Elasticsearch, enhancing client module functionalities and enabling efficient, real-time data processing.
- Participated actively in architectural discussions and complexity analysis decisions, contributing key insights and software design best practices for scalable services.

Software Developer Sr

Ceridian, d/b/a Dayforce

03/2020 - 09/2021

- Designed and built an entire leave application software suite using Angular, Node.js, Express.js, and MongoDB.
- Managed the end-to-end leave application cycle, handling logic from initial request submission and workflow tracking to final approval.
- Played a key role in major system design discussions, enhancing the application's architecture, usability, security, and overall user experience.

EDUCATION

Information Science and Engineering

UVCE, Bangalore(BU)

09/2011 - 09/2015

Bachelor of Engineering (BE)

Technical Engineer

Appveen., d/b/a Datanimbus

02/2018 - 03/2020

- Developed frontend components and implemented business logic using Angular, Node.js, Express.js, and MongoDB.
- Implemented structured Angular routing, client-side state management, and backend data flow logic.
- Conducted technical code reviews to maintain code quality, maintainability, and alignment with engineering standards.

UI Developer

Vxceed Software Solutions

02/2016 - 02/2018

- Collaborated with senior developers to design, structure, and modify HTML, CSS, and JavaScript for web pages.
- Implemented interactive features and UI functionality with JavaScript, including client-side form validation and dynamic content rendering.
